

VISHWAS V

☎ +91-9488205668 ✉ vishwasveeranna@gmail.com  [linkedin](#)

Summary

MCA (AI & Data Science) student with hands-on experience developing AI/ML and software projects, with a strong foundation in Python, machine learning, data analysis, SQL, and object-oriented programming. Experienced with Pandas, NumPy, Scikit-learn, Git/GitHub, Jupyter Notebook, and MySQL. Passionate about exploring practical applications of AI and making technical concepts accessible through clear communication, hands-on learning, and collaboration with peers.

Education

Master of Computer Applications (AI & Data Science)

2025 – 2027

Amrita Vishwa Vidyapeetham, Mysore

Bachelor of Computer Applications (BCA)

2022 – 2025

BGS First Grade College, Mysuru

Skills

Programming & Querying: SQL, Python, Java, C, HTML5, JavaScript, CSS

Technical Skills: Data Structures & Algorithms (DSA), Machine Learning, Artificial Intelligence, NumPy, Pandas, Scikit-learn, MySQL, Object-Oriented Programming (OOP), DBMS, Operating Systems

Tools and Technologies: Visual Studio Code, Git & GitHub, Jupyter Notebook, Google Colab, MySQL, PyCharm

Projects

AI-Powered Content Personalization in E-Commerce | *Python, AI & ML*

28 April 2026

- **Developed an AI-powered e-commerce personalization system** using Fuzzy Logic to recommend products based on user behavior, budget, and engagement.
- Designed and implemented a fuzzy inference system with fuzzification, rule-based reasoning, and defuzzification for personalized product ranking.
- Implemented multi-factor scoring using user browsing history, ratings, price sensitivity, and engagement to improve recommendation relevance.
- Built an interactive web-based prototype and utilized Python, Fuzzy Logic, Pandas, NumPy, Scikit-learn, and MySQL for intelligent recommendation generation.

Banking Management System | *Java, OOPS Concepts, VS Code*

Nov 2025 – March 2026

- **Developed a Banking Management System** using Java and Object-Oriented Programming (OOP) principles to simulate core banking operations.
- Implemented functionalities including account creation, deposit, withdrawal, balance enquiry, and transaction management using classes, objects, inheritance, encapsulation, and exception handling.
- Designed a menu-driven console application with a modular architecture, ensuring code reusability, maintainability, and efficient user interaction.
- Utilized **Java, Object-Oriented Programming (OOP), and Visual Studio Code** for application development and testing.

Awards & Certifications

- **Software Engineering — Infosys Springboard:** Completed training in software development, SDLC, programming fundamentals, problem-solving, software design principles, testing, and application development workflows
- **Oracle: Administration Workshop – Infosys Springboard (Apr 2026):** Completed training in Oracle Database Administration, including database architecture, user management, schema objects, SQL, and database administration fundamentals.

LANGUAGES

- English (Fluent) • Kannada (Fluent) • Tamil (Fluent) • Hindi (Basic Understanding)
